TEMPLATES & CHECKLISTS • GOLD TIER

Website Launch and Deployment Checklist

The definitive 150-point pre-launch and go-live checklist: Technical SEO, SSL certificates, payment webhooks, database backups, performance audits, and monitoring.

DOCUMENT SPECIFICATIONS & ACCESS METADATA

Document ID:
SS-VAULT-050

Access Tier Required:
Gold Membership or higher

Target Audience:
Full-Stack Developers, Architects, SaaS Founders

Curriculum Author:
SubSync Research & Engineering Labs

Verified Format:
Full-Length PDF Reference (Digital Master)

Release Cycle:
Q1 2026 Core Infrastructure Series

License / Permissions:
Authorized SubSync Member Use Only

EXECUTIVE HIGHLIGHTS & CORE DELIVERABLES

- Pre-launch technical SEO checklist: OpenGraph, sitemaps, robots.txt, canonicals
- Payment gateway and webhook production certification checklist
- Core Web Vitals optimization: LCP < 2.5s, CLS < 0.1, FID < 100ms
- DNS migration, SSL issuance, and zero-downtime cutover procedures

Table of Contents & Curriculum Map

CHAPTER 1	The Anatomy of a Flawless Production Launch	Page 2
CHAPTER 2	Domain 1: Code Quality, Build Validation & Asset Bundling	Page 3
CHAPTER 3	Domain 2: Environment Variables, Secrets & Database Connection	Page 4
CHAPTER 4	Domain 5: Payment Gateway & Webhook Production Readiness	Page 5
CHAPTER 5	Domain 6: Performance, Core Web Vitals & Caching Optimization	Page 6
CHAPTER 6	Domain 7: Technical SEO, Meta Tags, Sitemaps & Social Cards	Page 7
CHAPTER 7	Domain 8: Security, HTTPS, CSP Headers & Error Pages	Page 8
CHAPTER 8	Domain 9: DNS Cutover, SSL Certification & Rollback Plan	Page 9
CHAPTER 9	Go-Live Launch Day Hour-by-Hour Timeline & Sign-off	Page 10

Prerequisites & Master Competencies

This publication has been structured for immediate practical execution. Readers are advised to follow each section sequentially, validating code patterns, audit checklists, and metric calculations against their existing deployment environments.

- Mastery of core theoretical architectures and mathematical formulas
- Ability to design, audit, and troubleshoot scalable production systems
- Implementation of security best practices aligned with enterprise standards
- Streamlined execution of team workflows, SLAs, and performance benchmarks

SECTION 01 • CORE REFERENCE

The Critical Payment Gateway Go-Live Certification

Transitioning a payment gateway from test mode to live production requires systematic validation: 1) Verify matching live API Key ID and live Secret Key, 2) Configure production HTTPS webhook endpoint URL on the provider dashboard, 3) Select live webhook events (order.paid, payment.captured, payment.failed), 4) Test a genuine ₹1 transaction to verify end-to-end receipt generation, and 5) Confirm database subscription state transitions to Active.

```
// SUBSYNC SPECIFICATION CODE PATTERN & FORMULA REFERENCE

// Topic: Website Launch and Deployment Checklist
const verifiedStatus = verifySubscriptionAccess(user.tierLevel, resource.tierLevelRequired);
if (!verifiedStatus.granted) {
  throw new ForbiddenError("Upgrade to Gold tier to unlock this resource.");
}
await recordActivityLog({ action: "RESOURCE_DOWNLOAD", id: "website-launch-and-deployment-checklist" });
return serveProtectedFile(resource.filePath, { cacheControl: "private, max-age=3600" });
```

PRODUCTION TIP: RESILIENCE IN MULTI-TENANT ARCHITECTURES

When implementing Website Launch and Deployment Checklist in mission-critical SaaS platforms, ensure that database query footprints and file streams utilize chunked buffering to keep Node.js event-loop memory usage below 80MB per worker.

FINAL REVIEW & IMPLEMENTATION SIGN-OFF

Comprehensive Implementation & Audit Checklist

- [ ] Documented architecture and data flows reviewed by lead engineer
- [ ] All access control rules strictly enforced on backend API endpoints
- [ ] Unit and integration tests pass with zero unhandled promise rejections
- [ ] Audit logging and telemetry metrics active in production dashboard
- [ ] Database indexes verified with EXPLAIN ANALYZE to eliminate sequential scans
- [ ] Rollback and emergency incident response playbooks documented and rehearsed
- [ ] Compliance with GDPR / DPDP and regional data privacy standards verified
- [ ] Production environment variables verified with secret isolation

Official SubSync Digital Vault Attestation

This digital publication has been produced and verified under the SubSync Resource Quality Framework.
